SKILLS

- Javascript
- HTML
- CSS
- Responsive design
- UI and UX prototyping
- Debugging and testing
- Agile workflow
- Entity framework
- Unit testing
- API integration
- Node.js
- Version control
- RESTful services
- Object-oriented programming

Full-stack developer building production-style web applications using React, Node.js, and .NET. Experienced in authentication systems, REST APIs, and database-driven applications with MongoDB and SQL Server. Built and deployed multiple full-stack projects featuring JWT auth, Stripe payments, and role-based access control

EDUCATION

May 2025

Associate of Applied Science Computer Programming

Augusta Technical College, Augusta, GA

- Dean's List Summer 2024 and Fall 2024
- 3.8 GPA

May 2025

C# Developer Certificate Computer Programming

Augusta Technical College, Augusta, Georgia, GA

May 2024

Junior Web Developer Certificate Computer Programming

Augusta Technical College, Augusta, Georgia, GA

PROJECTS

Full-Stack Restaurant Ordering App

Technologies: React, Redux, React Query, Node.js, Express, MongoDB, Stripe, JWT Authentication

- Built a **full-stack restaurant ordering system** with a dynamic menu, customizable items, cart management, and checkout with payment integration.
- Implemented **user authentication and role-based access** for customers and admins, including order tracking and status updates.
- Designed a **real-time, responsive UI** with React and Redux for state management and React Query for server state caching.
- Created **admin dashboard** for viewing and managing orders with sorting and filtering capabilities.
- Implemented **unit and integration tests** for front-end components and API endpoints using Vitest and React Testing Library.
- Managed **data persistence** with MongoDB and designed normalized schemas for orders and cart items.
- Integrated **Stripe API** for secure payment processing and handled order validation and total calculation.

Full-Stack student mentor app

Technologies: React, C# ASP.Net, EF core, SQLServer, JWT Authentication

- Built a full-stack student mentor app with access to local job via **rapid api** as well as allowing mentors to interact with students.

- Implemented **user authentication and role-based access** for students, mentors, and admins each with different levels of access.
- Admins can see other users and update their role or delete the user.
- Uses **bcrypt** to hash passwords and uses env file to hide sensitive information.
- Designed **responsive UI with Tailwind CSS**

React Movie Explorer

Technologies: React, React Router, Tailwind CSS, TMDb API

- Built a **responsive movie browsing app** using React, React Router, and Tailwind CSS, allowing users to search for any movie and view detailed information including ratings, descriptions, and trailers.
- Implemented **debounced search** to optimize API calls and improve user experience.
- Integrated **TMDb API** for real-time movie data and multimedia content.
- Designed an **intuitive, visually appealing UI** with **Tailwind CSS** for responsive layouts on desktop and mobile devices.
- Enabled dynamic routing for **movie details pages**, supporting direct links and browser navigation.
